 (By Post) \$1.00

STA. GA., JANUARY 29, 1890.

Letter to Mr. William E. Chandler.

Washington dispatch of Sunday.

The following paragraphs.

Republican president, house and senate for the time in twelve years means something. What the ATLANTA CONSTITUTION said they mean the ATLANTA CONSTITUTION said they mean.

Mr. Grady answers.

We shall answer Mr. Chandler—but through choice, rather than necessity. No

respecting man is compelled to answer a man as a Senator Chandler. When

through deliberate fraud and villainy

the vote of the state of Florida and

and thereby made Hayes the fraudulent

of the United States, he put it

his power to ever challenge the

of any decent man.

These are strong words, but it is hard to

patient with this exquisite hypocrite,

adorned with the flagrant crime and the

indefeasible shame of our history, the

slaying of the presidency, he poses contin-

for a free ballot and a fair count, and

denounces the southern people as thugs and

chambers.

He was selected to go to Florida

because of his known and admitted facility

the lowest forms of political villainy,

he so abundantly justified his selection

he has never had the countenance of

the decent men of his own party. No

man now doubts that the vote of

Florida was cast for Tilden and stolen for

Hayes. The fraud was proven as it pro-

ved, in spite of Mr. Chandler's cur-

and one year later Mr. Grady secured

the lips of Dennis and Coxo the con-

fession of these frauds and print-

confessions in the New York Herald.

Chandler was in charge of the republic-

in Florida. He stole the vote of

the will of the American people as ex-

ed in the election of Mr. Tilden—he

the presidency for the first and last

in the history of the republic, and he

devoted the rest of his life to de-

ceiving the people he robbed of their

right and enslave his works—not

police court all parties, without belong-  
 ing to any. His imitator has done the same  
 thing. Napoleon, in six months after his  
 triumph in the Seine, was elected presi-  
 dent. Already the present administration  
 is shaky—perhaps Boulanger will suddenly  
 leap into power. The audacious general  
 has a strong backing. He is supported by  
 Orleansais, Bonapartists and radicals. Bet-  
 ter than all, he is the ideal of the women.  
 He is their ideal hero. They could not  
 vote for him, but they worked at the polls,  
 composed songs in his honor, and made the  
 streets ring with them.

There can be no half-way ending to such  
 a career. It must culminate in a splendid  
 success or a great disaster. Just now the  
 tide in the affairs of men seems to be bear-  
 ing Boulanger on to fame and fortune. But  
 it is not safe to make a prediction about a  
 Frenchman. We must wait for the unex-  
 pected to happen.

IF THE EAST MAIL-TRAIN on the Air-Line  
 railroad consisted of an ox-cart connection  
 between Washington and Atlanta, there  
 would be no trouble among the business  
 men of the south. A fast mail train with  
 an ox-cart connection is now one of the big  
 things.

MISS MOLLIE ANDERSON says she is not  
 the author of the article which she wrote  
 for the North American Review. This is an  
 admission that doesn't mean much. Prob-  
 ably she is the author of the article.

THE MAIL SERVICE. In the south is now  
 in a very fine condition. It has been run  
 over and crippled by the fast train on the  
 Air-Line railroad.

WHEN MISS MARY ANDERSON writes  
 another article for the press she will prob-  
 ably be the author of it.

EDITORIAL COMMENTS.

THE WIFE OF Mr. David B. Churchill, a  
 wealthy Bostoner, was not so certain a few  
 days ago that she was going to die that she  
 made preparations for the funeral. She ordered  
 mourning and sent for her relatives. Every-  
 thing was ready except the corpse. Just as  
 matters had reached a critical point, Mr. Church-  
 ill left his bed and expostulated with his wife in  
 vulgar language. He requested her to send her  
 guests to bed and to leave the house. He also  
 told her that he had no intention of dying, and  
 the funeral would have to be postponed indefinitely.  
 So the affair is off for the present.

PERSONS INTERESTED in the Scotch-Irish  
 congress to be held at Columbia, Tenn., on the  
 29th of May, can get further information by writing to  
 A. B. Floyd, the secretary of the congress at Colum-  
 bia.

"THE NEW YORK WORLD" almanac obli-  
 viates the names of the English lan-  
 guage. It is the starting point printed in a met-  
 ropolitan paper. Doubtless their room is needed  
 for a new edition. The almanac points called out  
 by this extraordinary paper.

SUPERINTENDENT Turner places the blame,  
 to a great extent, on the railroads and cites  
 instances showing that the continual delay  
 in the delivery of the mails, is in the failure  
 of the railroads to make connections.

OF course, a perfect service of postal clerks  
 and agents would amount to nothing with-  
 out an imperfect railroad service, and if the  
 railroads are to blame for the great annoy-  
 ance which our people are now undergoing  
 about their mails, they ought to be made to  
 shoulder the responsibility.

Our columns are at the disposal of the  
 railroad authorities, to show cause why  
 they should not be held responsible for our  
 present mail abomination.

The railroads are paid to carry the mails,  
 and they should be held to strict responsi-  
 bility when through inefficient service they  
 fail to do their part in the operation of a  
 complete mail system. There is absolutely  
 no excuse for sixteen failures of the postal  
 car to make connection at Albany, as cited  
 by Mr. Turner, and if such loose service is  
 to continue, the sooner criminal responsi-  
 bility is made the penalty for such negli-  
 gence, the better it will be for the traveling  
 and mail receiving public of the state.

WE demand a better mail service, and our  
 people will back us in seeing that we get it.

THE MAIL SERVICE in the south is now  
 almost as rapid and as certain as it was just  
 after the revolutionary war. Such a con-  
 dition of affairs is most commendable. It  
 shows that our fast mail trains and our  
 postal experts are becoming more accus-  
 tomed to what the boys call the political  
 situation.

COTTON CONSUMPTION IN EUROPE.  
 The Financial Chronicle, quoting from  
 Ellison's circular, says that the total con-  
 sumption of Great Britain has been 3,822,-  
 000 bales, of the average weight of 400  
 bales, an increase over 1887 of 105,000  
 bales, or last year of 91,000 bales, the con-  
 sumption reaching 3,731,000 bales. During  
 the year stocks have been materially re-  
 duced, and the visible supply showing a di-  
 minution of about 150,000 bales of ordinary  
 weights.

Since 1880 the consumption in Great  
 Britain has been augmented about 11 per  
 cent, and that on the continent the increase  
 during the same period has been over 30 per  
 cent; in other words, the difference in  
 favor of Great Britain is now only 39,000  
 bales, whereas eight years ago it was 652,000  
 bales. With regard to the year's business,  
 reports seem to indicate that it has been  
 quite satisfactory on the continent; the same  
 may be also said of spinning in  
 Great Britain, but weavers—owing to the  
 fact that looms have been increased much  
 faster than spindles—were in a somewhat  
 unsatisfactory position at the close of the  
 year.

THE weekly consumption in Europe is  
 now 148,000 bales of 400 pounds each,  
 against 145,000 bales of the same weight at  
 the corresponding time last year. The total  
 spinning stock in Great Britain and the  
 continent has increased 117,000 bales dur-  
 ing the month, but are now 452,000 bales  
 less than at the same date last season.

In making up his estimates of supply  
 and consumption, Mr. Ellison bases his figures  
 of American on a crop of 7,000,000 bales.  
 He calculates that the United States and  
 Canada will take 2,300,000 bales, leaving for  
 shipment to Europe 4,700,000 bales. The  
 probable import from East India is placed  
 at 1,402,000 bales, and Egypt is expected to  
 furnish 350,000 bales. The other Mediter-  
 ranean supplies it is believed will reach  
 about 50,000 bales and the imports from  
 Brazil and the West Indies are put down at  
 400,000 bales.

By allowing only 2,300,000 bales for the  
 United States, Canada, etc., Mr. Ellison  
 makes no provision for any increase in con-  
 sumption here except at the expense of  
 stocks, the figure he uses being about the  
 actual amount consumed in 1878-79. The  
 south is taking a greater amount of

cotton this year than ever before, and it is  
 by no means certain that there will be any  
 decrease in takings at the north.

THE ST. LOUIS REPUBLICAN has an article  
 defending the Dutch. The Dutch are  
 said to put it if they have to be defended  
 in St. Louis.

BILLY CHANDLER wants to slap the  
 fifteenth amendment on the south, and the  
 south is perfectly willing to have it slapped  
 on according to the decision of the supreme  
 court.

DANGER IN ELECTRIC WIRES.  
 There seems to be danger in electric  
 wires, and especially in wet weather.

The crossing of the electric light and tel-  
 ephone wires, and the fires which resulted  
 therefrom serve to show, to some extent,  
 the danger.

It is a matter which should command the  
 immediate attention of the officers of the  
 Electric Light company, for it seems that in  
 their wires the greatest danger lies. The  
 experience of Mr. Benjamin, who woke in  
 the dead of night to find his telephone box  
 burning, might be the experience of any  
 subscriber at any hour.

There is something wrong somewhere. If  
 it is in the placing of the electric light wires,  
 it is to be hoped that the Electric Light  
 company will remedy the defects at once.

THE MAIL SERVICE in the south is now  
 in a very fine condition. It has been run  
 over and crippled by the fast train on the  
 Air-Line railroad.

WHEN MISS MARY ANDERSON writes  
 another article for the press she will prob-  
 ably be the author of it.

## WILL INVITE HARRIS

AN ATLANTA COMMITTEE OF  
WAY TO INDIANAPOLIS  
WITH A LETTER FROM MAYOR C

The Atlanta Gentlemen Who Go to the Opening of the Cincinnati Chamber of Commerce Will Go On to Indianapolis and President-Elect to Come to Atlanta— of Success.

A committee of Atlantians is on the Indianapolis to invite General Harrison to visit Atlanta.

The Atlanta chamber of commerce has also a committee to attend the celebration

The committee consisted of Mr. J. G. By, chairman, Governor R. B. By, Mr. Stewart Woodson, Dr. R. D. Ing, and Mr. Jack Spalding. Mr. E. P. Berlin, another member of the committee, was detained at home by the illness of

By courtesy of Mr. J. J. Spaulding and Beiknap, of the Central road, the party went in a special car. The party went Western and Atlantic to Chattanooga, by the Queen and Crescent to Cincinnati. From the queen city the party will take the Big Four.

They will attend the celebration at the climatic chamber of commerce Wednesday night and leave for Indianapolis on Thursday.

LETTER FROM MAYOR GLENN.

Mr. J. G. Oglesby the chairman of the nittee will deliver to General Harris following letter from Mayor Glenn:

ATLANTA, Ga., January 28.—Hon. Benjamin H. Harrison, President-Elect.—Sir: The city of Atlanta the Exposition company in expressing it that you will favorably consider the formal

It will doubtless be a matter of interest to an American citizen, to attend the celebration the first quarter century of the city's return and to see the great progress made here during the period. I have the honor to be very respectfully,  
Yours,  
JOHN T. GLENN, M.

THE COMMITTEE HOPES TO SUCCEED  
The members of the committee and  
major expressed themselves as follows:  
BROOK BULLOCK: "When Mr.

President Harrison, it struck me favorable believe President Harrison will come, his disposition to come south, if possible of course there is no point he would so visit as Atlanta, where he fought during war. I feel sure that the committee will promise to take up the course with the view that public business does not, at the ticular time, prevent."

MR. OGLESBY: "I think that General rison will very favorably consider the vis

MR. STREWART WOODSON: "We shall use every effort possible to induce the same. I believe that a more intimate relation and intercourse is very beneficial to the interests of the country at large."

informed this committee will represent the common council of Atlanta and the Exposition company, and they will use every inducement to get him to come. I believe the visit of President Hayes was very beneficial to the south in many respects, and that if President Harrison can be induced to come here and acquainted with our people, it will be for the benefit of the south, and will give him a better opportunity to judge of the questions he will have to determine upon in his administration.

he will be delighted with wonderful progress that Atlanta made since the war. It had at most not 16,000 people when he saw it; now it has 7 with a commerce reaching through five states and amounting to hundreds of millions of dollars a year. I have no right to say that he will come here, but the committee do what it can."

Mrs. E. P. CHAMBERLIN: "I very much desired to go and regret that my wife's illness prevented me. I have no doubt that

Harrison will come, and think a visit to Lanta will be as pleasant for him as for us.

Mr. JACK J. SPALDING: "I believe he will come. I don't see any reason why he should not accept. This is the representative of the south, and he is president of the whole country he will certainly want to be around here and see this part of the country."

MAYOR GLENN'S TALK.

"There is reason to believe that General Harrison will consider the invitation favorable," Mayor Glenn said.

desires to see the south, and certainly not would give him such a knowledge of this of the country as a visit to Atlanta, its representative city. Not only as an American citizen but as General Sherman, he must feel special interest in the quarter-hundredth anniversary of the resurrection of a city up which he fought twenty-five years ago. When he sees the wonderful rehabilitation has taken place within half his own life he must feel more sensibly than ever the greatness of the work which he

The party left via the Western and Atlantic railroad at 1:35, and will arrive at Cincinnati at 6:40 this morning.

**POLICE COMMISSIONERS.**

They Hold a Meeting to Consider What Should Be Done With the Appropriation.

The board of police commissioners held an important meeting last night to consider what should be done with the appropriation of \$72,000.

This is \$14,000 over and above what would be current yearly expense of the force as it would be. What should be done with the \$14,000? There were present Chairman English, and members Brown, Brotherton, Martin and his wife the mayor.

"The expenses of the police department for year just ended," said Chairman English, "amounted to \$58,221.97."

"That paid for three meals a day for the police didn't it?" queried Mayor Glenn.

"Well," said the mayor, "I should think two meals would be enough," continued the mayor.

"I'm in favor of giving them three square meals," said Commissioner Brown.

"I think two meals is enough," said Chief of Police Sullivan.

"I think they ought to have three meals," said Commissioner Broderick.

"So do I," said Commissioner Martin.

"Oh, well," said the mayor, "I have no more to say on the subject."

"The matter is worth an investigation," said Chairman English. "If there is any waste at all, it is in the kitchen."

The present system lets stop the waste. I move the chief be ordered to make a study to be waited to ascertain what the general usage is, and report at our next meeting."

The motion was carried.

"What shall we do with the \$14,000?" asked chairman.

Chairman Brotherton submitted three different plans.

One provided for a three watch, or eight, system, and seventy-three men. The other provided for a two watch, or twelve-hour system, seventy-seven men. The third system was a combination system. It was a three

"They were eight, eight and twelve hours, and men were off just as the watches were over."  
But each of these systems provided for an increase of salary for the chief and the captains.  
"Now, I am opposed to that," said the member.  
"When we went before council and asked an appropriation, our plea was for more men; they had believed—e—we were going to increase salaries, not a dollar was given."  
"I look at it this way," said Chairman E.  
"We have an appropriation of \$74,000. The id to increase the chief and the force, and the chief judges then council of the best plant ad

"Those plans provide for five sergeants," said the mayor.

"I know it."

"But the city ordinances prescribe what shall be chosen, and provision is made for but one sergeant."

"And we don't propose to elect five until the

## WILL INVITE HARRISON.

AN ATLANTA COMMITTEE ON THE WAY TO INDIANAPOLIS

WITH A LETTER FROM MAYOR GLENN.

The Atlanta Gentlemen Who Go to Attend the Opening of the Cincinnati Chamber of Commerce Will Go On to Indianapolis and Uge the President-Elect to Come to Atlanta—Prospects of Success.

A committee of Atlantians is on the way to Indianapolis to invite General Harrison to visit Atlanta.

The Atlanta chamber of commerce appointed a committee to attend the celebration of the opening of the new Cincinnati chamber of commerce, and the committee was requested by the exposition company and the city to extend their trip to Indianapolis and urge the president-elect to accept the formal invitation, which will be sent later, to visit the celebration of the quarter-centenary of Atlanta's resurrection.

The committee consisted of Mr. J. G. Oglesby, chairman, Governor R. B. Bullock, Mr. Stewart Woodson, Dr. R. D. Spalding, and Mr. Jack Spaulding. Mr. E. P. Chamberlain, another member of the committee, was detained at home by the illness of Mrs. Chamberlain.

By courtesy of Mr. J. J. Spaulding and Mr. Bullock, of the Central road, the party went up in a special car. The party went by the Western and Atlantic to Chattanooga, thence by the Queen and Crescent to Cincinnati. From the queen city the party will take the Big Four.

They will attend the celebration at the Cincinnati chamber of commerce on Wednesday night and leave for Indianapolis on Thursday morning, and after seeing General Harrison, will return to Atlanta about Saturday morning.

LETTER FROM MAYOR GLENN.

Mr. J. G. Oglesby the chairman of the committee will deliver to General Harrison the following letter from Mayor Glenn:

ATLANTA, Ga., January 28.—Hon. Benjamin Harrison, President-Elect—Sir: The city of Atlanta joins the exposition company in expressing the hope that you will favorably consider the formal invitation to visit Atlanta which we have the honor to present to you. It will doubtless be a matter of interest to you, as an American citizen, to attend the celebration of the first quarter-centenary of the city's resurrection, and to see the great progress made here since that period. I have the honor to be very respectfully,

JOHN T. GLENN, Mayor.

THE COMMITTEE HOPES TO SUCCEED.

The members of the committee and the mayor expressed themselves as follows:

Governor Bullock: "When Mr. Grady first suggested the committee's going to see President Harrison, I struck me favorably. I believe President Harrison will come. It is his disposition to come, if possible, and of course there is no point in his not coming to visit Atlanta, where he fought during the war. I feel sure that the committee will get his promise to come, of course with the proviso that public business does not, at that particular time, prevent."

Mr. Oglesby: "I think that General Harrison will very favorably consider the visit and it will certainly be the desire of the committee to use every effort possible to induce him to come. I believe that a more intimate association and intercourse is very beneficial to the interests of the country at large."

Mr. Stewart Woodson: "We shall use our best efforts to induce him to come here and I think it will be a great thing for the city of Atlanta and the whole south if he will make a visit to this section and become more intimately acquainted with it. We shall press our claim to the best of our ability."

Dr. R. D. Spaulding: "I am correctly informed this committee will represent the common council of Atlanta and the Exposition company, and they will use every inducement to get him to come. I believe the visit of President Harrison will be very beneficial to the south in many respects. If President Harrison can be induced to come here and get acquainted with our people, it will be for the benefit of the south. It will give him the opportunity to judge of the questions that he will have to determine upon in his administration. I have no doubt that he will be delighted with the wonderful progress that Atlanta has made since the war. It had at most not over 10,000 people when he saw it; now it has 75,000, with a commerce and industry that ever states and amounting to hundreds of millions of dollars a year. I have no right to assume that he will come here, but the committee will do what it can."

Mr. E. P. Chamberlain: "I very much desired to go and regret that my wife's illness prevents me from leaving. My wife General Harrison will come, and I think a visit to Atlanta will be as pleasant for him as for us."

Mr. Jack J. Spaulding: "I believe he will come. I don't see any reason why he should not accept. This is the representative body of the south, and if he is president of the whole country he will certainly want to get around here and see this part of the country."

MAXON GLENN'S TALK.

"There is reason to believe that General Harrison will consider the invitation favorably," said Mayor Glenn. "He has expressed the desire to see the south, and certainly nothing would give him such a knowledge of this part of the country as a visit to Atlanta, its representative city. Not only as an American citizen but as General Harrison, he must feel a special interest in the quarter-centenary celebration of the resurrection of a city around which he fought twenty-five years ago. When he sees the wonderful rehabilitation that has taken place within half his own lifetime he must feel more sensibly than ever the greatness of the country over which he has been called to preside."

The party left via the Western and Atlantic railroad at 1:35, and will arrive at Cincinnati at 6:40 this morning.

## POLICE COMMISSIONERS.

They Hold a Meeting to Consider What Shall Be Done With the Appropriate.

The board of police commissioners held an important meeting last night to consider what should be done with the appropriation of \$72,000. This is \$14,000 over and above what would be the current yearly expense of the force as now organized. What should be done with the \$14,000?

There were present Chairman English and Commissioners Brown, Brotherton, Martin and his honor the mayor.

"The expenses of the police department for the year just ended," said Chairman English, "amounted to \$88,221.97."

"That paid for three meals a day for the prisoners, didn't it?" queried Mayor Glenn.

"Yes, sir."

"Well, I should think two meals would be enough," continued the mayor. "I have no objection to giving them three square meals," said Commissioner Brown.

"I think two meals is enough," said Chief Connolly.

"I think they ought to have three meals," said Commissioner Brotherton.

"So do I," said Commissioner Martin.

"Oh, well," said the mayor, "I have no motion to offer."

"The matter is worth an investigation," said Chairman English. "If there is any waste about the present system, let us stop it. I move that the chief be ordered to investigate the matter and ascertain what the general usage is, and report at our next meeting."

The motion was carried.

"What shall we do with the \$14,000?" asked the chairman.

Chairman Brotherton submitted three different plans.

One provided for a three watch, or eight-hour system, and seventy-three men. The other provided for a two watch or twelve-hour system, and seventy-seven men. The third system was a sort of combination system. It was a three watch system, but the watches were not of equal length. They were six, eight and twelve hours, and the men were of five as many hours as they were on.

But each of these systems provided for an increase of salary for the chief and the captains.

"Now, I am opposed to that," said the mayor. "When we went before council and asked for an appropriation, our plea was for more men. If they had believed we were going to increase their salaries, not a dollar would they have given."

"We have an appropriation of \$72,000. The idea is to increase the efficiency of the force, and we are better judges than council of the best plan to adopt."

"These plans provide for five savings," said the mayor.

"I know it."

"But the city ordinances prescribe what officers shall be chosen, and provision is made for but one way."

"And we don't propose to elect five until the city council."

ordinance provides for five," said Chairman English.

"The question is this," persisted the mayor, "shall we increase the pay of the chief and of these captains, or shall we expend every cent of the \$14,000 in getting more footpads?"

"We don't want more footpads," laughed Commissioner Brotherton.

"I mean the policemen that walk all the time—the watchmen," said the mayor.

"If all the money goes that way," said Commissioner Brotherton, "I move that all the superfluous money be put on my regular patrolmen, and that we proceed to the election of five more regular patrolmen."

"We ought not to go into an election unless Commissioner Stephens was here," objected Mayor Glenn.

"I don't think there will be any trouble about that," said Chairman English.

Mayor Glenn's motion was carried.

Mayor Glenn nominated J. C. Martin, and Mr. Martin was elected unanimously.

Commissioner Brotherton nominated E. R. Pelt, and Mr. Pelt was elected by a vote of four to one.

Commissioner Martin's man was W. M. Harrison, and he was elected by a vote of three to one. These two votes were cast against him because he is fifty-three years old, almost too old to start out as a policeman.

"We ought not to go into an election unless Commissioner Stephens was here," objected Mayor Glenn.

"I don't think there will be any trouble about that," said Chairman English.

Mayor Glenn's motion was carried.

**OPINION OF AN EXPERT.**

Mrs. Mary D. Welch, Teacher Domestic Economy, Iowa State University, says: "My deliberate judgment is that the oven of this range as compared with others, is not only more equally heated in every part, but as well as that, but as a result of the superior regulation the food placed therein is better cooked, while retaining a greater flavor, and a larger proportion of its best juices. I find, also, that the consumption of fuel in this range is much less than any other for same work."

## DEATH IN THE WIRES.

## THE DANGER IN THE ELECTRIC LIGHT WIRES.

## A MATTER WHICH INTERESTS ALL.

Crossing with the Telephone Wire, the Wire of the Electric Light Company Cause the Box to Blaze Up—This May Occur in Fifty Places at Once at Midnight—A Danger Which Must be Averted.

Danger lurks in electric wires.

And especially in wet weather.

During the last few days of wet weather the electric light wires have been behaving badly, and the matter has become so serious that the public need to be informed on the subject in order that they may protect themselves.

Friday night the electric light wire was crossed with the East Tennessee telephone wire and burned out the instruments on the Georgia division between here and Rome in an incredibly short time. The instrument at the Kimball house was burned out as well as the one at the East Tennessee depot, the one at Braswell, the other side of Dallas was burned and the operating table was set fire.

The instrument burned was the one at Atlanta Junction, two miles from Rome.

Saturday night, at half past 3 o'clock, Mr. Benjamin's telephone blazed up and began to tear the box. Mr. Benjamin put it out by tearing down the wire. He thinks it was caused by crossing with the electric light wire, and says it would have burned the house on fire if he had not discovered it.

Sunday night there was another crossing of the wires, and the cable box at the corner of Hunter and Forsyth streets was set fire and burned.

The current flowing the telephone wire to Mr. Sciple's telephone and burned out the coil. The effect of the current was stopped by the melting of the wire at the cable box in the telephone pole at the corner of Hunter and Forsyth streets.

## WHERE THE TROUBLE LIES.

The trouble is that the insulating material around the big copper electric light wires loses its effect when it becomes wet, and when the wires are crossed in wet weather the electric light wire communicates to the telephone or telegraph wire as much of the current as it will carry. If the wire so touched, is big enough, it will carry enough of the current to kill. Fortunately the telephone wires will not carry enough for that. The larger sizes of telegraph wire, however, will carry enough to the current to destroy life, and the telegraph office is compelled to provide for such emergencies. In the Atlanta Western Union office about 100 wires come in, and each one is provided with a "circuit breaker," which is a little instrument through which the current is made to pass over a brass trigger into the office. If a powerful current like that of the electric light or lightning, a magnet trips the trigger from its connection and the wire is practically cut in two.

It is death to touch an electric light wire in wet weather while the current is on. This cannot too strongly be impressed on the minds of people. Not long ago a wire of the electric light wire dropped in front of Governor Say's carriage on Montgomery. It fell on the horses and they were instantly killed. A little dog ran up to see what was the matter and smelled the end of the wire. As soon as his nose touched it he was dead.

One evening about two months ago, while the workmen had lowered an electric light at the corner of Washington and Hunter streets, the wire sprang and the ground and the wire so high but a boy might have reached it by jumping. A number of little boys were playing in the street and gathered about the wire, and one of them touched it. A gentleman passing by called out to them to keep away from the lamp. But for that some of them might have jumped. A little dog ran up to see what was the matter and smelled the end of the wire. As soon as his nose touched it he was dead.
